

# ALL FIBRE DRUM

## incorporating AF Flush System

### Pattern 5 and Ecodrum

Available in two styles, Pattern 5 made from 100% renewable virgin kraft, and Ecodrum made from 100% recycled fibreboard.

Both are designed for packing powder, solid and hazardous products with a choice of standard slip on lid, or the AF Flush system.

- Fully recyclable, easily disposable and derived from fibre, a renewable resource.
- UN approval for transportation of dangerous goods.
- Can be printed with your company logo and product information.
- Low tare weight means savings on transport costs.

### AF Flush System

The AF Flush System provides a flat external surface making taping easier and more efficient. The depth of the lid is normally 100mm, although it can be manufactured to suit your specific needs.

### Bitupak

To aid product release, Bitupak incorporate a silicone lining for the packaging of solid setting products.

AF Flush Body

Standard Body

# Pure fibre, nothing added...

## ALL FIBRE

Fibre slip on lid available for all sizes.

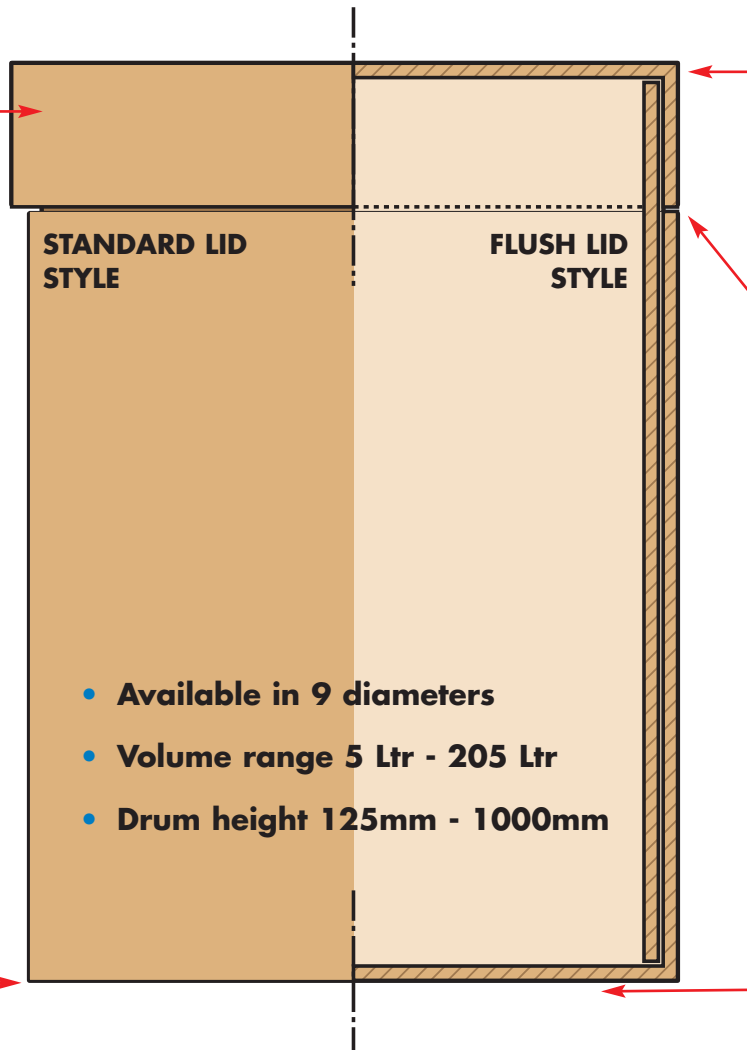

There are three derivatives of the All Fibre drum:

**PATTERN 5** - Drum and lid are made from virgin kraft material.

**ECODRUM** - Drum and lid are made from 100% recycled fibreboard.

**BITUPAK** - Drum interior is silicone lined to enable the packing of products requiring high release properties, such as solid setting bitumen.

In wet conditions base maybe treated to prevent moisture ingress.

Different lid depths available according to specific needs.

### AF FLUSH SYSTEM

Flush lid with drum body allows for easier taping.

Decoration by printing or painting helps to promote company and product image.

Drum performance to UN Packaging Group II and III (solids) standards.

To improve lifting and handling, a recessed base is available.

- By supplying drums loose, stretchwrapped or palletised, Fibrestar Drums will match your handling and delivery needs.

- All-fibre drums may be re-used, recycled or thermally recovered. Disposal should take any relevant legislation into account.
