

WASTEPAK - FIBRE

Every year 1000's of tonnes of waste material are incinerated within the United Kingdom. Landfill is no longer a viable solution. WASTEPAK aims to reduce the costs of the incineration waste route, with a more readily available, lower cost alternative to the "favoured" steel drum.

- ❑ **UN approved**
- ❑ **30ltr to 250ltr capacity range**
- ❑ **Reduced incineration costs and duration with respect to steel drums**
- ❑ **Readily available ex stock unlike reconditioned steel drums**
- ❑ **Reduced residue, which still has commercial value**
- ❑ **Mono material All Fibre version available for zero residue**
