

CYLINDERS & LIDS

Protective Range

Cylinders provide an ideal internal core for reels of wire, cable and metal strip.

- Cylinders provide protection and reduce the potential of damage to your product.
- Wall thickness ranges from 1mm to 20mm.
- Collapsible cylinders available, minimising storage space, reducing transport and handling costs.

Fibre lids are used as end protection caps for reeled products such as floor covering and film based products.

Protecting reel ends prevents damage during transit and handling, reducing the costs incurred by damage.

- Bespoke to your specific requirements
